This data is intended to serve the user as a handy reference and not as a complete drug information resource. It does not include information on every therapeutic agent available. The publication covers over 1,900 commonly used drugs. In addition, it does not include all potentially relevant information about any particular drug. Instead, it is intended to present important aspects of drug data in a more concise and accessible format than is likely to be found in medical literature or product material supplied by manufacturers.

The nature of drug information is that it is constantly evolving because of ongoing research and clinical experience and is often subject to interpretation. While Wolters Kluwer Clinical Drug Information makes reasonable efforts to publish accurate information, users are advised that the authors, editors, reviewers, contributors, and publishers cannot be responsible for the continued currency of the information or for any errors, omissions, or the application of this information, or for any consequences arising therefrom. Therefore, the authors, editors, reviewers, contributors, and publishers shall have no liability to any person or entity with regard to claims, loss, or damage caused, or alleged to be caused, directly or indirectly, by the use of information contained herein. Because of the dynamic nature of drug information and the characteristics and needs unique to individual patients, readers are advised that decisions regarding drug therapy must be based on the independent judgment of the clinician. Users must regularly consult multiple sources (eg, medical literature and a manufacturer's most current product information) to remain aware of changing information about a drug and medical practices regarding its use. Therefore, this data is intended to be used in conjunction with other necessary information and is not intended to be solely relied upon by any user. The user of this data hereby and forever releases the authors, editors, reviewers, contributors, and publishers of this data from any and all liability of any kind that might arise out of the use of this data. The authors, editors, reviewers, contributors, and publishers are not responsible for any inaccurate source materials developed by third parties or for any user misinterpretation that may arise from the data.

Certain of the authors, editors, reviewers, and contributors have written portions of this book in their individual capacities. The inclusion of content is not intended to indicate that it has been reviewed or endorsed by any federal or state agency, pharmaceutical company, or regulatory body.

The publishers have made reasonable efforts to avoid reproducing without permission, any content that may be subject to third party copyright claims. Any questions regarding content that may be subject to such claims will be addressed at the first opportunity.

If you have any suggestions or questions regarding any information presented in this data, please contact our drug information pharmacists at (955) 833-0577. Book revisions are available at our website at <http://www.wolterskluwer.com/clinical-drug-information-revisions/>.
