Kevin M. G. Taylor

Aulton's PHARMACEUTICS

The Design and Manufacture of Medicines

Fifth Edition

INTERNATIONAL EDITION

NOT FOR SALE IN EUROPEAN ECONOMIC AREA, CANADA, JAPAN, AUSTRALIA AND NEW ZEALAND

ELSEVIER

Contents

Preface	vii
Contributors	viii
Acknowledgements	x
What is pharmaceutics? Michael E. Aulton and Kevin M. G. Taylor	1
1. Design of dosage forms Peter York	6
PART 1 Scientific principles of dosage form design	
2. Dissolution and solubility Michael E. Aulton	18
3. Properties of solutions Michael E. Aulton	37
4. Surfaces and interfaces Graham Buckton	47
5. Disperse systems David Attwood	60
6. Rheology Christopher Marriott	93
7. Kinetics Gareth R. Williams	114
PART 2 Particle science and powder technology	
8. Solid-state properties Graham Buckton	128
9. Particle size analysis Kevin M. G. Taylor	140
10. Particle size reduction and size separation Michael E. Aulton	158
11. Mixing Andrew M. Twitchell	172
12. Powder flow Michael E. Aulton	189
PART 3 Pharmaceutical microbiology and sterilization	
13. Fundamentals of microbiology Geoffrey W. Hanlon	201
14. Pharmaceutical applications of microbiological techniques Norman A. Hedges	227
15. Action of physical and chemical agents on microorganisms Geoffrey W. Hanlon and Norman A. Hedges	250
16. Principles of sterilization Susannah E. Walsh and Jean-Yves Maillard	268
17. Sterilization in practice Jean-Yves Maillard and Susannah E. Walsh	278
PART 4 Biopharmaceutical principles of drug delivery	
18. Introduction to biopharmaceutics Marianne Ashford	296
19. Gastrointestinal tract – physiology and drug absorption Marianne Ashford	300
20. Bioavailability – physicochemical and dosage form factors Marianne Ashford	319

21. Assessment of biopharmaceutical properties Marianne Ashford 339
 22. Dosage regimens *Soraya Dhillon, Nkinuka Umaru and John H. Collett* 363

PART 5 Dosage form design and manufacture

23. Pharmaceutical preformulation Simon Gaisford 380
 24. Solutions Sudaxshina Murdan 407
 25. Clarification Andrew M. Twitchell 417
 26. Suspensions Susan A. Barker 427
 27. Emulsions and creams Gillian M. Eccleston 446
 28. Powders, granules and granulation Michael E. Aulton 476
 29. Drying Michael E. Aulton and Satyanarayana Somavarapu 498
 30. Tablets and compaction Göran Alderborn and Göran Frenning 517
 31. Modified-release oral drug delivery Emma L. McConnell and Abdul W. Basit 564
 32. Coating of tablets and multiparticulates Stuart C. Porter 580
 33. Hard capsules Brian E. Jones 597
 34. Soft capsules Keith G. Hutchison and Josephine Ferdinand 612
 35. Dissolution testing of solid dosage forms Ana Cristina Freire and Abdul W. Basit 626
 36. Parenteral drug delivery Robert Lowe 638
 37. Pulmonary drug delivery Kevin M. G. Taylor 653
 38. Nasal drug delivery Gary P. Martin and Alison B. Lansley 671
 39. Ocular drug delivery Hala Fadda, Ashkan Khalili, Peng Tee Khaw, and Steve Brocchini 690
 40. Topical and transdermal drug delivery Adrian C. Williams 715
 41. Rectal and vaginal drug delivery Kalliopi Dodou 739
 42. The formulation and manufacture of plant medicines G. Brian Lockwood 758
 43. Delivery of biopharmaceuticals Jeoma F. Ucheogbu and Andreas G. Schätzlein 769
 44. Pharmaceutical nanotechnology and nanomedicines Yvonne Perrie 784
 45. Design and administration of medicines for paediatric and geriatric patients Catherine Tuleu, Mine Oriu and David Wright 804

Part 6 Packaging and stability of pharmaceutical products

46. Packaging Sudaxshina Murdan 820
 47. Chemical stability in dosage forms Andrew R. Barnes 836
 48. Microbial contamination, spoilage and preservation of medicines Norman A. Hodges 850
 49. Product stability and stability testing Paul Marshall 862

Self Assessment Please check your eBook at <https://studentconsult.inkling.com/> for self-assessment questions. See inside cover for registration details.
