# Full Stack Web Development with Raspberry Pi 3

Build complex web applications with a portable  
computer

Packt>

# Table of Contents

<b>Preface</b>	1
<b>Chapter 1: Getting Started on the Raspberry Pi</b>	7
<b>The Internet of Things</b>	8
<b>A brief look at our application</b>	9
The sensor interface - perception	10
The database - persistence	10
The user interface - presentation	11
The application server - middleware	12
<b>Setting up our Raspberry Pi</b>	12
<b>Remote access</b>	17
<b>Summary</b>	23
<b>Chapter 2: Getting Up-and-Running with Web Development on the Raspberry Pi</b>	25
<b>The network</b>	25
<b>The web development stack</b>	28
The UI - the user's first encounter	29
The server - the brains of the application	30
Client-server communication	30
Interfacing with external hardware	34
The database - adding persistence to our data	37
Integrating the database into our application	37
The overall architecture	39
<b>Summary</b>	40
<b>Chapter 3: Running a Node Server on the Pi</b>	41
<b>Introducing nodes - the server side JavaScript runtime</b>	41
Installing node on the Pi	42
<b>Running our first node program</b>	43
Setting up a version control system	44
Back to our program	45
Installing external libraries	46
Developing the application server	48
Adding routes to the server	49
Starting up the server	50
Keeping the server running in the background	51

<b>Summary</b>	54
<b>Chapter 4: Extracting Information from the GPIO Pins</b>	55
<b>The GPIO pins on the Pi</b>	56
<b>The pin as a standalone component</b>	57
The Write mode	57
The Read mode	59
<b>Fine-tuning our control - using the GPIO command-line tools</b>	61
<b>The DHT11 sensor</b>	63
<b>Reading from the sensor</b>	64
<b>Summary</b>	66
<b>Chapter 5: Retrieving Sensor Readings from the Server</b>	67
<b>Understanding how our node process takes readings</b>	68
<b>Modifying our server code to show sensor readings</b>	71
<b>Optimizing our server</b>	73
Abstracting our sensor library code	73
Caching our results	75
<b>Summary</b>	80
<b>Chapter 6: Creating a Web Page to Display Sensor Data</b>	81
<b>Extending our application</b>	81
Serving static files from the Express server	83
<b>Building the UI's functionality</b>	86
Adding client-side JavaScript	86
Fetching sensor readings using XHR	87
<b>Visually enhancing the UI</b>	91
Changing the structure of our UI	93
Adding style to the newly modified structure	94
<b>Summary</b>	97
<b>Chapter 7: Enhancing Our UI - Using Interactive Charts</b>	99
<b>Considerations when implementing complex features</b>	100
<b>Introducing Chart.js</b>	100
Installing Chart.js	101
Creating our first chart	102
<b>Making the server response data-friendly</b>	105
Modifying the sensor dashboards to consume JSON data	106
<b>Integrating sensor data into our charts</b>	108
A code overview	111
index.js	111
public/index.html	112

public/script.js	113
<b>Summary</b>	118
<b>Chapter 8: SQLite - The Fast and Portable Database</b>	119
<b>Picking the correct tool for the job</b>	120
Installation	121
<b>Creating the temperature and humidity tables</b>	122
<b>Running CRUD operations</b>	123
Create	124
Read	124
Update	126
Delete	127
<b>Aggregations</b>	127
Advanced aggregations using subqueries	128
<b>Summary</b>	130
<b>Chapter 9: Integrating SQLite into Our Application</b>	131
<b>Getting started: Interfacing SQLite with node</b>	132
<b>Running queries with node</b>	133
<b>Making our database module</b>	134
Adding a new temperature to the database	134
Fetching the last	135
Fetching readings between a certain time period	135
Fetching the average of readings between time periods	136
Putting the functions together in a module	136
<b>Integrating the database module into our server application</b>	138
Upgrading the sensor interface module	138
Adding an API to get the latest ten readings	139
Consuming the API on the client side	141
<b>Adding new features - the ability to view readings from a custom time period</b>	143
Adding the required APIs	143
<b>Summary</b>	148
<b>Chapter 10: Making our Application Real Time with Web Sockets</b>	149
<b>Web sockets</b>	150
<b>Implementing web sockets in our application</b>	151
The socket.io library	152
Client-side installation	154
Server-side installation	155
<b>Creating our socket implementation in our application server</b>	155

Client-side implementation	161
Summary	164
<b>Chapter 11: Deploying our application to Firebase</b>	<b>165</b>
<b>The Firebase platform</b>	166
<b>Migrating to Firebase</b>	166
The User interface	166
Database	167
Server application and sensor interface	167
<b>Creating your first Firebase application</b>	168
Installing the Firebase CLI	170
Logging in to Firebase on the command line	170
Initializing a new Firebase application	171
Testing and deploying the application to the cloud	173
<b>Migrating the frontend assets</b>	175
Adding Firebase tools	179
<b>Adding the Realtime Database</b>	180
<b>Enabling access to the Firebase Database</b>	182
<b>Adding listeners to the client-side script</b>	182
Summary	184
<b>Chapter 12: Using Firebase APIs to Update Our Application</b>	<b>185</b>
<b>Application server versus application process</b>	185
<b>Securing our application</b>	187
<b>The application process architecture</b>	188
<b>Implementing the application process</b>	191
Summary	195
<b>Index</b>	<b>197</b>
