

# Urban Public Health

*A Research Toolkit for Practice and Impact*

Edited by Gina S. Lovasi, Ana V. Diez Roux, & Jennifer Kolker

## CONTENTS

*Contributing Authors* ix

*Foreword* xv

*Preface* xix

### **PART I. Introduction to Urban Health** 1

1. What Is Urban Health? Defining the Geographic and Substantive Scope 3  
*Ana V. Diez Roux*
  - Why Urban Health? 3
  - The Geography of Urban Health: Urban Areas, Cities, and Neighborhoods 5
  - The Substance of Urban Health: Key Elements and Approaches 17
2. Global Urbanization and Health Trends 27  
*Ana V. Diez Roux*
  - Urbanization Patterns Worldwide 27
  - Urban Living and Health 33
  - Urban Health on the Global Agenda 46
3. Conceptual Models and Frameworks for Understanding the Links Between Urban Environments and Health 56  
*Ana V. Diez Roux*
  - Conceptualizing the Links Between Places and Health 56
  - Multisectoral Approaches to Urban Health 63
  - Urban Health Research Questions and Policy Options 68
4. Urban Health Inequities 76  
*Ana V. Diez Roux*
  - What Are Urban Health Inequities? 76
  - Describing Urban Health Inequities 77
  - Causes of Urban Health Inequities: The Role of Residential Segregation 81
  - Approaches to Reducing Urban Health Inequities 92
  - Urban Health Inequities as a Major Challenge for Urban Health 99

## **PART II. Identifying and Collecting Data for Urban**

### **Health Research 107**

5. Assessment of the Urban Environment: Measurement Scales, Modes, and Metrics 109  
*Gina S. Lovasi*  
    Why Measure the Urban Environment 109  
    Where and at What Level to Measure Urban Features 111  
    What to Measure: Domains and Indicators for Citywide and Neighborhood Level Assessment 114  
    Secondary Spatial Data on Health Determinants From Governmental, Open, and Commercial sources 118  
    Primary Data Collection Across Entire Urban Spaces or Across Sampled Locations 121  
    Closing Thoughts on Measuring Health-Relevant Aspects of the Urban Environment 128
6. Human Perceptions and Reflections on the Urban Context 136  
*Gina S. Lovasi and Stephen E. Lankenau*  
    Overview of Data on Human Perceptions and Reflections About the Environment 136  
    Quantitative Data to Capture Perceptions of the Environment 137  
    Qualitative and Mixed Methods Research to Understand How Residents View and Reflect on Urban Environments 146  
    Closing Thoughts on Improving Our Understanding of Perception and Reflection in Urban Contexts 149
7. Characterizing and Mapping Health in Urban Areas 156  
*Gina S. Lovasi and Steve Melly*  
    Selecting Health Outcomes to Match Urban Health Goals 159  
    Health Data Sources and Consideration for Their Use in Urban Contexts 164  
    Mapping and Characterizing Spatial Variation in Health 171  
    Closing Note on Alignment Across Goals, Data Sources, and Visualization Strategies 175

## **PART III. Tools for Working With Urban Health Data 179**

8. Managing and Integrating Diverse Sources of Urban Data 181  
*Gina S. Lovasi and Steve Melly*  
    Variable Creation and Manipulation to Facilitate Linkage 181  
    File Naming and Metadata to Ease Navigation and Linkage 186  
    Bringing It All Together: Linking and Sharing Data Sets and Associated Documentation 187

Spotlight on Strategies for Integrating Geographic Data With Clinical Records	189
Concluding Thoughts on Managing Diverse Data Sources for Urban Health Research	194
<b>9. Analysis Strategies for Relating the Urban Environment to Health</b>	<b>197</b>
<i>Gina S. Lovasi</i>	
Descriptive, Causal Inference, and Evaluation-Related Analyses Goals	197
Accounting for Multilevel and Spatial Structure	199
Transformation of Urban Environment Variables to Address Nonlinearity or Collinearity	200
Design and Analytic Strategies to Reduce Confounding in Studies of Environmental Influence on Health	205
Closing Thoughts on Analysis Options	211
<b>10. What Do We Know About What Works? Synthesizing the Evidence</b>	<b>216</b>
<i>Gina S. Lovasi and Rosie Mae Henson</i>	
What Can Be Synthesized	216
Goals for Evidence Synthesis	217
Types of Review: Formality, Format, and Breadth of Included Evidence	217
Steps and Considerations for Conducting Systematic Reviews Relevant to Urban Health	220
Global and National Evidence Repositories Relevant to Urban Health	224
Concluding Note on Evidence Synthesis for Urban Health	224
<b>11. Systems Approaches to Urban Health</b>	<b>229</b>
<i>Ana V. Diez Roux and Ivana Stankov</i>	
Key Features of Systems	230
Using Systems Approaches to Engage Stakeholders: Participatory Group Model Building	232
Simulating Urban Systems: Agent-Based Models and System Dynamics Models	236
Challenges and Opportunities for Systems Approaches to Urban Health	239
Caveats and Conclusion	244
<b>PART IV. From Evidence into Action</b>	<b>249</b>
<b>12. Partnerships and Collaboration: An Urban Focus</b>	<b>251</b>
<i>Jennifer Kolker and Amy Carroll-Scott</i>	
Background	251
Urban Public Health Actors	252

Multisector Collaboration	260
Conclusion	261
13. Community Engagement and Participatory Approaches for Urban Health	263
<i>Amy Carroll-Scott</i>	
Introduction	263
Community Partnership Challenges	264
Community Partnership Solutions	268
The Importance of Coalition-Building for Cross-Sector, Place-Based, Collective Action Approaches to Improving Urban Health	278
Conclusion: An Integrated View of Community Health Action in Urban Contexts	281
14. Policy in Urban Health: The Power of Cities to Translate Science into Action	287
<i>Jennifer Kolker</i>	
Policy Defined	287
Policy and Public Health	289
Policy and Cities: Tools to Impact Health	291
Challenges to Policymaking	302
Measuring and Evaluating Policy: How Do We Know If It Works?	308
Conclusion	311
15. Dissemination of Urban Health Research to Maximize Impact	314
<i>Jennifer Kolker, Claire Slesinski, Amy Carroll-Scott, and Jonathan Purdie</i>	
Background	314
Planning and Designing for Dissemination	318
Dissemination to Policy Audiences and Decision Makers	320
Types of Dissemination Products for Policy Audiences	323
Dissemination to Community Actors	326
Digital Dissemination and Social Media	329
Monitoring and Tracking the Reach of Dissemination	332
Conclusion	332
Concluding Remarks	336
<i>Acknowledgments</i>	339
<i>About the Authors</i>	341
<i>Index</i>	343
